Enrolment statistics

This table shows the number of electors eligible to vote at the referendum for each division, State or Territory and the nation.

These statistics are calculated by adjusting the enrolment as at the close of rolls with subsequent amendments, such as the death of an elector prior to polling day, a provisionally-enrolled elector turning 18 by polling day, or the reinstatement of an eligible elector previously removed from the roll.

Declaration votes received

This table shows the number of declaration votes received by each division, State or Territory and the nation for each vote type. For information on the different vote types, see **Types of votes**.

Postal and pre-poll votes are broken up into those received directly in the division in which the voter is enrolled in – column labelled ‘Own Division’ – and the total received from all divisions, including ‘Own Division’ – column labelled ‘Total Votes’. This means the number received in any division issued by other divisions is the ‘Total Votes’ less those in ‘Own Division’. Those received for other divisions are forwarded to the division the elector is enrolled in for checking and counting.
